

Price Settings

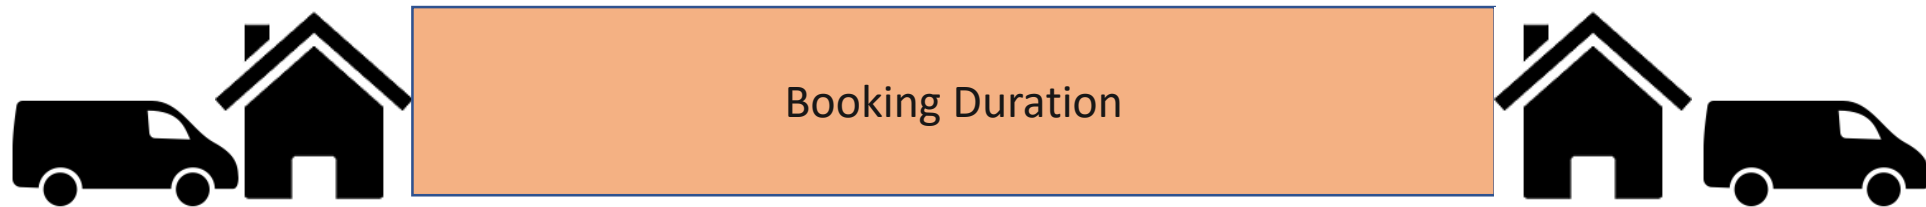

The building blocks of price calculations

Introduction

- Instant-quote.co supports several products.
- It's assumed these are for a service that is delivered off-site.
- Wedding cars, Bouncy Castles, Photo-booths, Marquees, Hot tubs etc.
- The generic term we use for these items is **Assets**.
- This document gives you an insight to how assets can be priced.

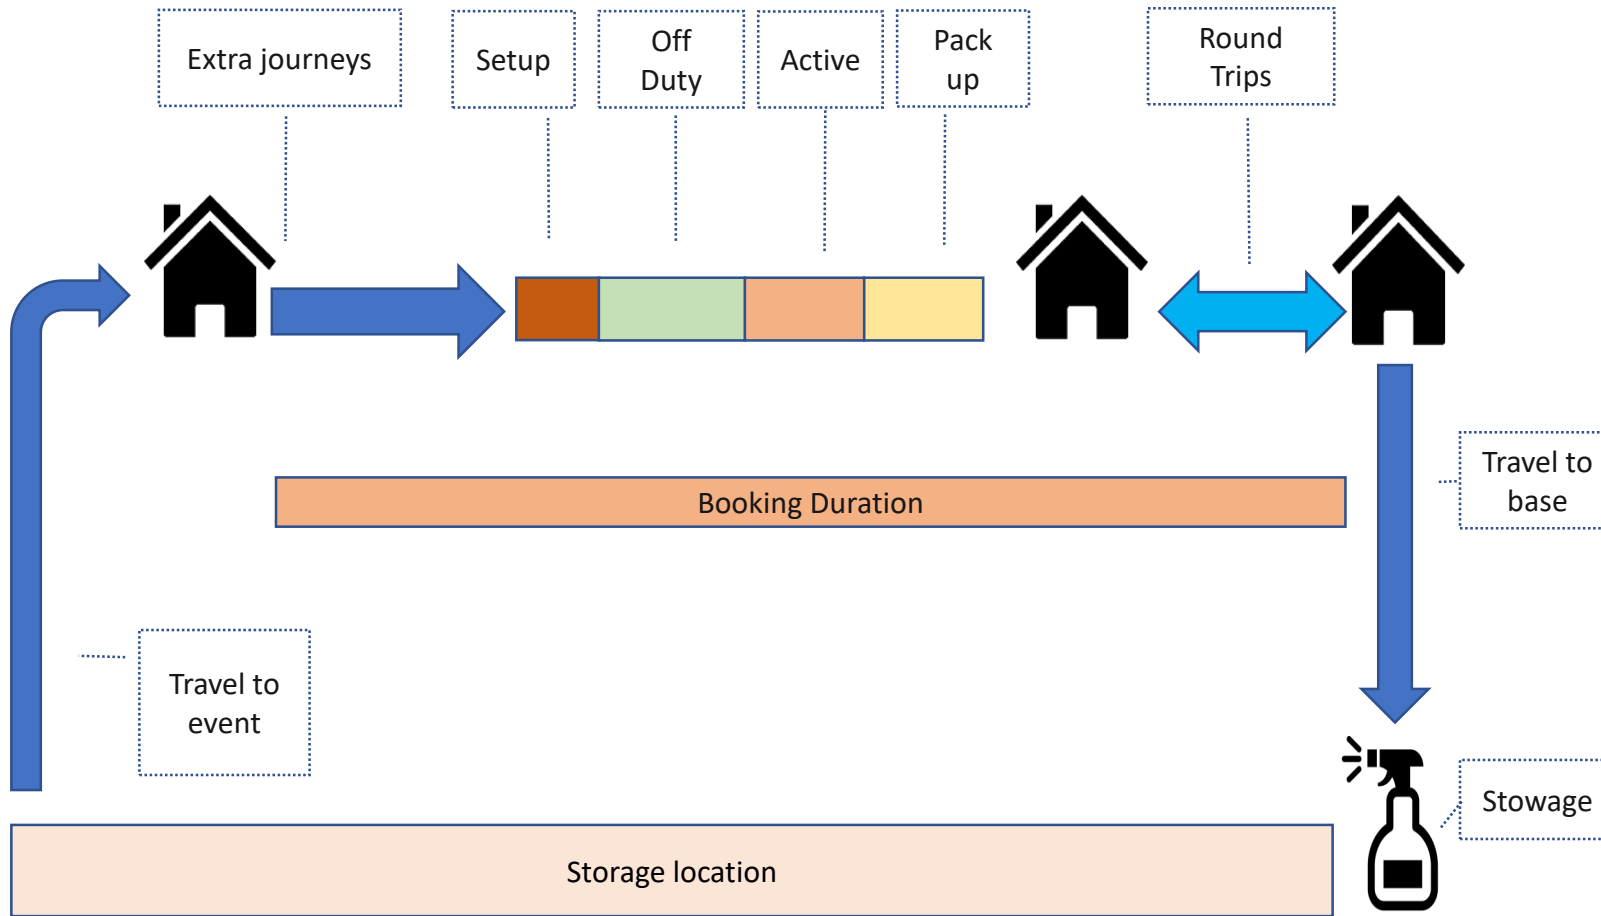

The basic price

- If no other settings are configured only the booking price configured in the price list is charged – irrespective of time or distance.

- But there are many options you can configure.

Pricing elements- time

Item	Effect
Active	Standard hourly rate
Setup	Modifies hourly rate
Off Duty	Modifies hourly rate
Pack-up	Modifies hourly rate
Journeys	Adds to charge
Stowage	Adds to charge
Round trips	Adds to charge
